♀ IN A NUTSHELL

I led several projects as Principal Investigator (PI), amounting to a **total of 3.3 million €** of research funding (including indirect costs and overheads). I also participated to several research projects as co-PI, amounting to a **total of more than 970 thousand €**.

In projects where I acted as PI, I directly managed funds, personnel and took direct responsibility for the advancement of project activities. In projects where I acted as Co-PI, I participated in the scientific activities supporting the main PI but did not take direct budget responsibilities.

I participated to the organization of conferences a workshops, directly managing the funds given from associations and institutions to cover expenses and invite young scientists and scientists from low-income countries. For these activities, I contributed to obtain and manage (in different capacities) about 45 thousand €.

MY RESEARCH

My research focuses on past sea-level changes and past climates, and their significance as analogues for the future of our planet. I have a parallel interest in modern coastal environments, where I investigate coastal erosion, extreme wave events, interactions between ecological and geological processes and trajectories of coastlines and nearshore environments under changing climates and sea levels.

Below are shown some infographics on my research outputs (manuscripts and datasets) and the areas where I worked. The full list of outputs is listed at the end of the CV.
